

Did you know?

This is how big you were when you were only 11 weeks old. From then on you breathed (fluid), swallowed, digested, urinated, and had bowel movements, slept, dreamed, and awakened, tasted, felt pain from touch and heat, reacted to light and noise, and were able to lean things.

After 11 weeks no new organs began functioning; you just grew more mature.

This baby was born when the mother was only 4 1/2 months pregnant and is a normal healthy child today.

This is what is left after a developing baby of 8 weeks is killed by suction abortion.

This is what is left after a developing baby of 10 weeks is killed by suction abortion.

This is what your feet looked like when you were only 10 weeks old. Perfectly formed? Yes! You even had fingerprints then.

Did you “come from” a human baby?

No! You once were a baby.

Did you “come from” a human fetus?

No! You once were a fetus.

Did you “come from” a fertilized ovum?

No! You once were a fertilized ovum.

A fertilized ovum? Yes! You were then everything you are today!

Nothing has been added to the fertilized ovum who you once were except nutrition.

Abortion-on-demand laws give to one person (the mother) the legal right to kill another (the baby) in order to solve the first person’s social problem.

Should we continue to do this?
